Send secure and traceable e-mails

Directly from your e-mail client or business software

SWISS POST

Protecting sensitive information

Normal e-mails are as easy to read as a postcard. It is therefore advisable to encrypt sensitive information such as contracts or personal data when e-mailing. IncaMail, a digital mailing service, allows you to send e-mails securely, with encryption and in accordance with the applicable data protection laws.

IncaMail is officially recognized as a secure delivery platform by the Swiss Federal Department of Justice and Police (FDJP).

The advantages for you

Easy: Send e-mails with one click from your existing e-mail client or business software.

Secure: E-mail contents are encrypted according to international standards with patented technology.

Traceable: Outgoing and incoming IncaMail messages are documented by Swiss Post.

«IncaMail was very easy to integrate. It only took a few hours Operation and support of IncaMail are guaranteed by Swiss Post.»

Urs Ziegler, Head of IT Governance, St. Galler Kantonalbank
